Lost or stolen phone

What to do. Pin this page where every nurse can read it.

1 *Tell the officer in charge at once.* Write down the time you found out.

2 The admin opens **Account**, then **Team**, finds the person and presses **Remove**. They lose access to the records, and their phone is locked the next time it goes online. You can invite them again later with a new phone.

3 Change the password of that person's email account if the phone was open.

4 Tell hello@primahealth.com.ng. Prima will help you decide whether the law requires you to report it, and when.

5 The patient records on a phone are protected by the PIN, but they are not encrypted on the phone. That is why the PIN and the phone's own screen lock matter.

Write down: the time you found out _____ who told the officer in charge _____

Help: WhatsApp _____ or hello@primahealth.com.ng

Training sign in table

A clinic is not trained until this table is signed. Pass mark: 8 of 10 for each person.

Clinic: _____ Date: _____

Trainer: _____

Name	Role	Quiz (of 10)	Signature

The officer in charge signs here: _____ Date: _____

Weekly count: paper against Prima

Every Friday, after clinic. Write numbers only. Never write a patient's name.

Clinic: _____ Counted by: _____

Week starting	Patients on paper	Patients in Prima	Visits on paper	Visits in Prima	Vaccine doses on paper	Vaccine doses in Prima	Why they differ

A difference that nobody can explain is read by the clinical safety lead. A difference in vaccine doses is always read.

Incident form

Anything that went wrong, or nearly went wrong. Nobody is blamed for reporting. Do not write a patient's name: write the card number if the record must be found.

Date and time	
Clinic	
Your role (not your name)	
What happened, in your own words	
On which screen	
What did you do?	
Was a patient affected? How?	
Was it caught before the patient was harmed?	

How serious is it? Circle one: A B C

A: stop	A record saved on the wrong patient, records lost, or a privacy incident. Stop using Prima, use paper, and tell us the same day.
B: near miss or error	A mistake caught before harm, a wrong value corrected, a sync problem that was fixed.
C: trouble using it	Confusing words, slow screens, a button hard to press.

Send it to the builder the same day. Level A: stop using Prima first.
