# Prima quick card

Prima keeps the record. It does not diagnose and it does not decide. You decide.

**BEFORE YOU SAVE**

## Read the name and the age aloud. Check the card.

## Every patient

**1** **Register:** fill in the form and press **Register**. If you see **This patient may already be registered.**, look at that person first.

**2** **Find a patient**, or **Scan card**.

**3** **Add visit:** check each number, then **Save visit**. **Flags are a guide, not a diagnosis.**

**4** **Add vaccine:** check the date, then **Save vaccine**.

## Every shift, at the start and at the end: look at the sync badge

| | |
|---|---|
| **Offline** | No internet. Keep working. |
| **waiting to upload** | Still only on this phone. |
| **Synced** | Safe in the cloud. |
| **need attention** | Tell your admin. |

## Phone lost or stolen

Tell the officer in charge **now**. The admin opens **Account**, then **Team**, and presses **Remove**.

**STOP RULE.** A wrong patient, lost records, or a privacy problem: stop using Prima, use the paper register, and tell us the same day.

**Keep the paper register for four weeks. Count both every Friday.**

Help: WhatsApp _____ or hello@primahealth.com.ng

Never send a patient's name, phone number or a photo of the screen.
